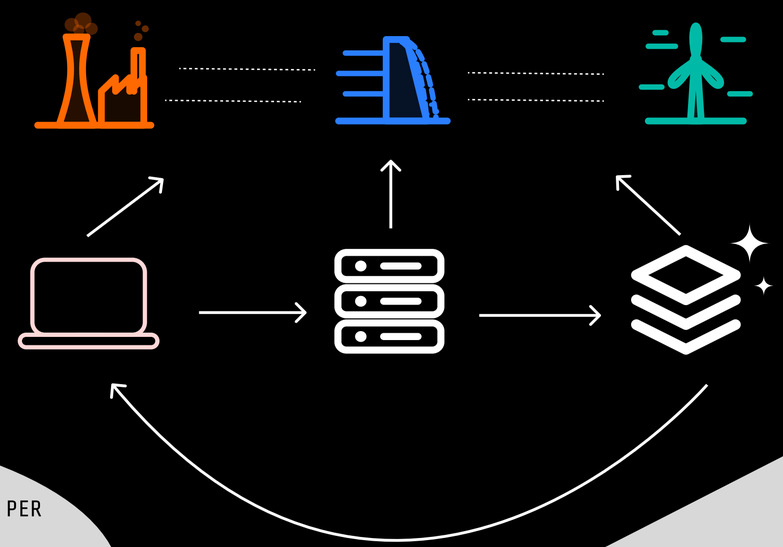
CONSEQUENCES OF USING AI MEANINGLESSLY

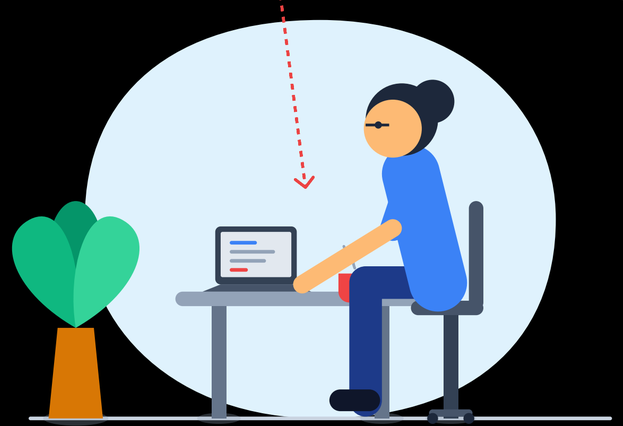
EVEN A SIMPLE EXCHANGE REQUIRES THE AI TO GO THROUGH A FULL PROCESS:
RECEIVE VOICE / TEXT → CONVERT TO TEXT
WORD SEGMENTATION & SEMANTIC UNDERSTANDING → RECOGNIZE "THANK YOU"
INVOKE THE MODEL TO GENERATE A REPLY



Many people add “Thank you” or other meaningless words in the end of their prompt.This simple action have a lot of consequences.

IF 100 MILLION USERS SAY "THANK YOU" ONCE PER DAY:

- ANNUAL POWER CONSUMPTION ≈ 10.95 MILLION KWH
- EQUIVALENT TO THE ANNUAL ELECTRICITY USE OF MORE THAN 5,000 HOUSEHOLDS



You say "thank you" → AI responds

Consumed 0.0003 kWh of electricity

- Roughly equivalent to a 10W night light running for 1 minute and 48 seconds
- Roughly 2% of a mobile phone battery

- Roughly the same as a microwave running for 1 second
