Infrastructural Process

Location of the Base-Stations in China

Water resources are distributed in areas very close to these base stations

Inner Mongolia
Hebei
Beijing-Tianjin
Gansu
Sichuan
Yunnan

Geographical location: Facilities located near rivers, lakes, or seas will prioritize the use of natural water bodies for "free cooling."

Water resource policies: In water-scarce regions, the use of tap water is strictly restricted, and the adoption of recirculating water systems is mandatory.

Water resources

1 USER-LEVEL

Electronic device (phone, computer...), web, application
Enter a

FIBER OPTIC CABLE:
Transmit information

2 ASSESS SCHEDULING

Manage information order and receive user-level requests.
Assign to different available servers and server rooms.

3 COMPUTER CLUSTER

CPU & GPU:
Process received information and perform analytical operations.

4 DATA STORAGE

HARD DRIVE:
Stores various information, such as AI models, conversation logs, and documents.

5 DATA CENTER INFRASTRUCTURE

HARDWARE:

1. Computing Hardware
2. Storage Hardware
3. Networking Hardware
4. Infrastructure Hardware

6 RETURN THE RESULT

Chemical waste liquid

Water Cooling System

Computer Chip:
Ga, Ge, In.....

Metal

Power Station
